

Technical Solutions Concept

Technical Solutions Project Group

Bridging the Needs of Oil-and Gas-producing Countries with Japan's Technical Seeds

JOGMEC promotes “Technical Solutions Project” that uses cutting-edge and advanced technologies (seeds) of Japanese companies to solve technical problems (needs) of oil-and gas-producing countries. These activities aim to expand opportunities for Japanese companies and strengthen the relationships between Japan and oil-and gas-producing countries, and to contribute in the securing of a stable supply of energy and resources for Japan.
